DETAILED ACTION

Allowable Subject Matter

Claims 1-7 and 13-16 are allowed.

With respect to claims 1-7 and 16, the reference fails to teach the use of a hydroxy alcohol with a acrylic emulsion polymer and a water swellable, colloid-forming clay mineral in an aqueous anti-icing composition.

Although the use of a hydrogen peroxide is know to be used with a polyol in a cleaning composition, there is nothing in the prior art of reference to suggest that it could be used in a anti-icing composition.

With respect to claims 13-15 the reference fails to teach the use of a fully hydrolyzed poly vinyl alcohol with the required amount of polyol in an anti-icing composition.

Therefore it would not have been obvious to one of ordinary skill in the art at the time the invention was made to create the instantly claimed anti icing compositions in view of Clarke, Coffey and Ma; nor is there motivation for any combination of the references to create the instantly claimed compositions.
